PLANTING DIRECTIONS FOR TULIPS

Plant Tulips in the fall—September, October or November—the ideal time being just before the ground freezes, so late planting is the best. They should be set about five inches deep, in good, well drained soil—good drainage is important for any bulbs you plant in the fall. A thin layer of sand upon which to lay the bulb will well repay for the trouble, and take care not to push the bulb down in with the thumb—simply lay it at the bottom of your trench, then cover with good growing soil. Plant them 5 to 7 inches apart. During the winter the bed should be covered with straw, leaves, or other coarse litter. What a wonderful showing you will get for this little trouble.

VENUS. Large, exquisite Tulip of silvery rose; white base with delicate blue ring.

PRINCE OF WALES. A glowing cherry-red—the finest of its color.

VALENTIN. Lovely light violet color with electric blue center. An outstanding beauty, either in the garden or in bouquets.

FEU BRILLIANT. A glorious scarlet Tulip, large, perfectly formed, and borne on extra long stems. Very early bloomer.

Our Fall Bargain Prices on the above six Extra Select Darwin Tulips: 10 for 60c; 25 for \$1.40; 50 for \$2.40; 100 for \$3.95.

Louis XIV.

OUR REGAL DARWIN COLLECTION

Ten each of the above six Tulips—the aristocrats of them all—the 60 DARWIN TULIPS for only \$2.22, postpaid.

Majestic Breeder Tulips

If you want something unusual and striking in Tulips, you should by all means include some of the rich Breeders in your border. Nowhere else can you get such distinct combinations of vivid colors—harmonious blendings of purple and old gold, bronze and yellow, orange and brown—and their huge blooms and tall thick stems make them wonderful for cut flowers, while in the garden they last a very long time. They are late to bloom and often have a sweet fragrance. We cannot say too much of their beauty and strong physique.

BRONZE QUEEN. Large, strong flower, finely formed, beautifully colored purplish fawn, with olive base. A great favorite.

DOM PEDRO. A rich coffee-brown and maroon, shaded with old gold. Very distinctive.

PANORAMA. A magnificent bloom of deep orange-red shaded mahogany; very striking in a mass planting.

CARDINAL MANNING. Large bloom of deep rose-lilac blended with bronze.

YELLOW PERFECTION. Beautiful large flowers of light bronze-yellow with golden yellow edge.

LOUIS XIV. One of the grandest of all Tulips, color a rich dark purple, shaded steel-blue, flushed with bronze. Its enormous size and regal appearance help to make it the great favorite it is.

Our Fall Bargain Prices on the above six varieties of Breeder Tulips: 10 for 55c; 25 for \$1.20; 100 for \$3.85, postpaid.

Be sure to include some of our choice Cottage Tulips in your planting this fall.

The Heavenly Blue is the choicest of the Grape Hyacinths, having blooms of a bright, clear, irresistible blue. Splendid either in borders by themselves or in the perennial or bulb garden, yet just as delightful in the wild flower garden, or in the lawn under the trees where the sod is thin. 10 for 30c; 25 for 60c; 100 for \$1.70, postpaid.

Snowdrops

(Galanthus)

Snow-white, nodding blooms that peep out in very early spring before the frost is hardly out of the ground. They find a natural setting under hedges, edging evergreens or shrubbery, and are a real joy to the winter-tired heart. It is best to plant this bulb as soon as you get it, setting it 2 inches deep, and mulching in winter with leaves, straw or coarse litter. 10 for 45c; 25 for 80c; 100 for \$2.90, postpaid.

Crocus in the Lawn.

Crocus

This sweet early spring flower bravely springs up year after year, sometimes before the snow is gone. Their large, funnel-shaped flowers, gayly colored, are borne on rather short stems. Plant them in borders along your shrubbery groups or perennial beds, at the edge of the rock garden, while planted here and there through the lawn where the sod is thin, their early flowers will greet you joyfully every spring. Set 2 to 4 inches deep and 2 inches apart where they will get good drainage. They can also be planted in pots for indoor culture. Choice of **Purpurea Grandiflora** (large purple), **King of the Whites** (large, pure white), **Mammoth Yellow** (bright canary yellow), and **Sir Walter Scott** (white striped lilac). 10 for 35c; 25 for 70c; 100 for \$2.10, postpaid.

Scilla Sibirica

(Squills)

Their merry, bright blue, bell-like blooms are so charming on the early spring landscape. Let them edge your perennial or bulb garden, or beautify your rock garden. Plant in ordinary soil about 3 inches deep; will do well in either sunshine or shade. 10 for 40c; 25 for 75c; 100 for \$2.75, postpaid.

Chionodoxa

(Glory-of-the-Snow)

Dwarf flower spikes, producing from 12 to 15 starlike flowers of brilliant blue with a pure white heart, are a beautiful sight in early spring. Set about 3 inches deep, either in sun or half-shade, and let them come back year after year in all their glorious beauty. Lovely in the rock garden, too. 10 for 40c; 25 for 70c; 100 for \$2.60, postpaid.

Narcissus Poeticus Recurvus.

Our Select Dutch Hyacinths

Fragrant, Colorful, and Lovely.

If in a rather moist location, a little sand placed beneath each bulb will prove beneficial. Mulch with straw or leaves, and do not uncover too early in the spring. PLANTING DIRECTIONS

Peonies can be successfully planted in either spring or fall. Plant in good, rich soil, in an open, sunny situation if possible, with the eyes 2 or 3 inches below the surface of the ground, never deeper. If planted too deep, Peonies are apt to be shy bloomers. The Stately Lilies

WE HAVE EXTRA CHOICE, LARGE BULBS.

Regal Lily • *Lilium Regale*

Regal, superb, hardy, and a wonderful coloring—is it any wonder that the Regal is so popular everywhere. Once you see a Regal Lily in bloom and glimpse its extraordinary beauty, then realize how very hardy it is and how easy it is to grow, you will readily understand its very desirability. Large, stately blooms are borne on strong, sturdy stems, often 4 and 5 feet high, and what magnificent blooms they are—white lightly suffused pink, with beautiful canary-yellow at the center and extending part way up the trumpet. Delicately perfumed. Blooms in June and July. Plant in fall or early spring, in any good, rich, well drained soil, setting it about 5 inches deep, and placing a little sand beneath the bulb. A garden without the Regal Lily is hardly a garden at all. Fine blooming size bulbs, 10c each; 10 for 90c; 25 for \$2.00, postpaid.

Regal Lily.

Madonna Lily • *Lilium Candidum*

Large, pearl-white flowers, deliciously fragrant, are borne in June and July on tall, erect stems. They are undeniably lovely in the lily garden, or make a wonderful background in the perennial border, where they secure the necessary shade the bulbs like.

This Lily likes a good deep soil that is not too dry, and should be left undisturbed for years. We have found, though, that this is one Lily that does best if planted shallow, the tops just below the surface, and then given a mulching of well-rotted stable manure. Plant in the fall only. Hardy and will thrive in almost any section. Fine, blooming size bulbs, 18c each; 6 for 90c; 12 for \$1.50, postpaid.

Madonna Lily.

Tiger Lily • *Lilium Tigrinum*

'Tis the fine old-fashioned sort that needs no description. Handsome, bright orange-red flowers, thickly covered with large, purplish spots, that make a grand show in the garden during August and September. Very hardy, thrifty grower and fine for massing. Select, blooming size bulbs, 20c each; 3 for 50c; 10 for \$1.50, postpaid.

Double Tiger Lily • *Lilium Tigrinum Flore Pleno*

Wonderful showy flowers. These choice blooms have the same colors as the single Tiger Lily, but are double clear to the center. Hardy and desirable. 25c each; 3 for 60c; 10 for \$1.75, postpaid.

Lemon Lily • *Hemerocallis Flava*

Not a bulb, but generally classed as a perennial. It is one of the old-time favorites and will always be popular. Very hardy, thriving almost anywhere, but does exceedingly well in a moist place or in shade. Abundant grasslike foliage makes a very beautiful background for the wealth of clear yellow blooms in June. Unusually effective in clumps or masses in the garden. Fine, blooming size plants, 25c each; 5 for \$1.00; 10 for \$1.75, postpaid.

Lilium Umbellatum.

Gold-Banded Lily of Japan • *Lilium Auratum*

There is no other Lily like this majestic beauty. Its enormous blooms with reflexed petals are borne on 4- to 6-ft. stems, are of pearly white thickly studded with crimson spots, while each petal bears through the center a royal stripe of golden yellow. These grand blooms profusely crown the plant in August and September, and give a marvelous effect. Clumps of them among groups of evergreens or among Iris or Peonies make a glorious showing. Perfectly hardy, requiring only good, well drained soil but should be planted deeply, where it will be sheltered somewhat from strong winds and from the heat of midday. 35c each; 3 for \$1.00; 10 for \$3.00, postpaid.

Lilium Speciosum Rubrum

One of the grandest of all Lilies, with large, rich crimson blooms showing purple-crimson spots and margined white. Splendid dark green foliage, with as many as 10 to 15 blooms on a spike oftentimes. Plant deeply, in good, well drained soil. 40c each; 3 for \$1.10; 10 for \$3.50, postpaid.

Lilium Umbellatum

In June this showy Lily is covered with great heads of large, handsome, orange-red flowers. One of the easiest Lilies to grow and one of the most beautiful. 25c each; 5 for \$1.00; 10 for \$1.90, postpaid.

Ferris' Famous Evergreens

Plant Our Wonderful, Shapely Specimens Around Your Home So That You May Enjoy Their Distinctive, Colorful Charm Throughout the Year.

This fall is an ideal time to start your evergreen planting. Get the trees established now so that next spring their new vigorous growth will make a quick start. A group of our select trees along the foundation or at the entrance will display their lustrous, colorful beauty right from the start—your winter landscape for once will be relieved of its dreary bareness.

Ferris evergreens, you know, are the finest that can be grown. For 64 years we have been specializing in evergreens. We develop them under our own system of root-pruning and transplanting and give them expert

care from the time they are started until they are ready to leave the nursery.

For fall planting we especially recommend Balled and Burlapped evergreens, although the following varieties in transplanted sizes of 2 feet and under are giving excellent results when not Balled: Junipers, Cedars, Arbor-Vitae, Retinispura, and the hardy Norway Spruce.

Plant Ferris' Evergreens This Fall—While Prices are the Lowest They Will Ever Be.

(If you wish more complete descriptions of our Evergreens, send for our large spring catalog).

Transplanting Directions for Balled and Burlapped Evergreens

When planting Balled and Burlapped evergreens in the fall, dig a hole about twice the size of the ball, and plant the tree as soon as it reaches you. If the ground is dry at planting time, fill the hole with water two or three times, and let it soak away before putting in the tree. Take care to handle the tree carefully so as not to break the ball, place it in the hole so that the tree will be a few inches deeper than it had been in the nursery, then cut the burlap at the top of the ball and roll it back for three or four inches. Plant ball, burlap and all, using good growing soil to pack around the ball, and be sure to pack this soil firmly.

When the hole is about two-thirds full of soil, pour in a pail of water and allow it to soak away, then continue filling with the good soil, almost to the surface of the ground, always packing it firmly. Leave a layer of loose soil at the top of the ground to prevent baking, and do not mound the soil up around the trunk, but it

should dip in slightly towards the trunk so as to catch and retain all moisture.

Keep the ground around the trees free from weeds and grass. If you have dry weather after planting, give the trees a thorough soaking about every other evening until you get a good rain, then mulch heavily with well-rotted straw or sawdust, taking care to put on plenty of it. A judicious trimming at planting time is also beneficial.

For planting and care of small evergreens, or for those handled without balls, see our spring catalog.

Pyramidal Arbor-Vitae

What a beauty it is—our Pyramidal Arbor-Vitae—growing a classic head, slender and pointed, that is thickly covered with lacy, bright green foliage. Never growing too tall or bushy, it is ideal for almost any kind of landscape planting. A pair of them at the entrance is especially charming, and they are so very attractive in the foundation setting—between the windows or at the corners of the dwelling where they stand out prominently. They require no shearing, for their natural development is the perfect pyramid that makes them the ideal landscape evergreen. You will be delighted with our choice specimens.

Ferris' Free Landscape Service

If you are one of the many people desirous of getting a plan made to exactly fit your home grounds and specifications, why not take advantage of our Special Landscape Service? Because of the great demand in the past for this service, we are continuing the department again this season.

ALL YOU NEED TO DO is to write us for our sketch blank. On this blank are full and simple directions so that anyone can make us a rough drawing of their home grounds. Upon returning this drawing and a remittance of \$2.00, we will have our landscape expert make a landscape drawing and planting chart that will give you an accurate and balanced plan to follow in planting your home grounds.

Then, if you purchase the planting material from us this fall and the order amounts to \$15.00 or more, the \$2.00 you have already paid for the plan is applied on the order as a due bill, **THUS GIVING YOU THIS LANDSCAPE SERVICE ABSOLUTELY FREE**. The \$2.00 remittance required when we make the drawing is merely to keep away idle curiosity seekers. The Landscape Department maintains the right to charge a slightly higher rate where lots of over 60x200 feet are planned.

Juniper Meyeri

Just imagine thick, pointed foliage, lacy and beautiful like all of the Junipers, and of a deep, rich blue color, then add to this a delightful, rather irregular form—sometimes more upright, again more trailing—and still you could not picture the unusual beauty of the Meyer Juniper. In the rock garden or close to the pool, it best displays its distinctive features, and you will find it just as fascinating in the foundation planting. This is by far the most popular of the new dwarf evergreens.

Spiny Greek Juniper

(*Juniperus Excelsa Stricta*)

If you want a rather low growing evergreen of formal design—something different than the ordinary—plant the Spiny Greek Juniper. For best results, it should be planted in a sunny, dry place where it will develop a very compact, rather broad low pyramid of classic outline, and of a beautiful blue color. It grows slowly, very evenly, and for this reason is of outstanding favor for the foundation planting, for the rockery, or formal garden. A new Juniper that is coming to the front with great speed.

Planting Suggestions for Perennials

They can be planted successfully in the fall as well as spring, and if planted in the fall they will bloom the following year. Plant in good, rich soil prepared the same as for any garden crop, and as a rule the crowns level with the ground. Soil should be kept well pulverized and free from weeds and grass, with plenty of moisture especially until well established. Most perennials like at least some sunlight. A light covering of straw or leaves over the perennial bed in winter is beneficial and especially necessary with newly planted perennials; apply when the ground is frozen 2 inches down, and do not uncover too early in the spring.

Ferris' "BORDER OF BEAUTY" Collection of Perennials

A wealth of bloom from early spring until late autumn! You simply cannot imagine the beautiful picture that this collection will create around your home, nor the joy it will give to your whole family. These 154 charming perennials will nicely fill a space about 4 feet wide and 20 to 30 ft. long.
